

The Best Pure Talk Senior Cell Phone Plans

Pure Talk is a prepaid mobile virtual network operator offering various services. They provide no-contract cell phone plans starting at \$25 per month for a single line and \$16 per line for a family of four. Subscribers to the network can also take advantage of low-cost family plans and Pure Talk senior cell phone plans, such as the visible unlimited package.

All Pure Talk plans include Unlimited Talk & Text, high-speed broadband access up to 5G, voicemail, caller ID, call forwarding, conferencing, call waiting, voicemail, caller ID, and call forwarding, conferencing, and call waiting. Pure Talk mobile phone plans provide no data overage fees, so if you've used all your high-speed mobile internet allotments, you'll enjoy unlimited data at 256Kbps speeds.

Before diving into some of the best Pure Talk cell phone plans for seniors, this article looks at some of the phone plans that Pure Talk offers to all of its customers, the network that the company uses, the phones that are compatible with the Pure network, and some of the other benefits that switching to the company can provide.

What Is Pure Talk?

Pure Talk was founded in 2004 as a subsidiary of Telrite Holdings in Covington, Georgia. Telrite Holdings is a holding company that owns H2O Telecom, H2O Bolt, and Life Wireless, among other wireless providers. Pure Talk has a 100% US-based customer service team to assist you with any problems with your service.

The company uses AT&T's network to deliver nationwide wireless service. Pure Talk operates on AT&T LTE bands, including 2, 4, 5, 12, 14, 17, 29, 30, and 66, and AT&T's 5G channels. If you want the most acceptable coverage, internet speeds, and performance on the AT&T network, make sure your phone has as many suitable bands as possible.

Aside from the core bands, you can use AT&T's official coverage map or a third-party map like RootMetrics to check AT&T coverage in your location. RootMetrics compiles speed test data from its consumers to generate its own independent AT&T network coverage map.

Which Phones Are Compatible with Pure Talk?

You can bring your phone to PureTalk if it's unlocked and works on the GSM network (AT&T or T-Mobile). The term "unlocked" refers to a phone not bound to any particular carrier, contract, or financing arrangement.

Consider contacting your current carrier to discover whether your phone is already unlocked or to learn how to unlock it. If you have a CDMA phone, you might be able to bring it over. You can find this information on the carrier's website.

You can use the Pure Talk IMEI checker on their website to see if your cell phone is compatible with the Pure Talk network provider. Check your device's compatibility with the company's network using the easy technique outlined below.

- **Visit the Pure Talk network website.**
- **Click the button "Enter Your Device ID".**
- **Enter your mobile phone IMEI number.**
- **Then click the "Continue" button.**

If the cell phone is compatible with T-network Mobile's service provider, the IMEI checker will display a 15-digit number. The IMEI number of a cell phone is permanently inscribed beneath the battery, on a label on the phone box, or can be found in the device's settings.

However, you may get your IMEI by dialing ***#06#**. T-Mobile supports both Android and iPhones. If you don't want to buy a new phone, you can bring your own to Pure Talk as long as it's compatible with GSM networks. To use the BYOP option, you must complete the steps outlined below.

- **Purchase a \$3 SIM card kit online with a service plan.**
- **Insert the SIM card into your phone.**
- **Activate it through the Pure Talk website or call their customer service line at 1-877-820-7873.**

Why Should You Switch to Pure Talk?

Individuals or families looking for low-cost prepaid cell phone plans on the AT&T network may consider this company. Pure Talk's first-month deal of 50% off and free

eSIM activation make them a perfect way to test the AT&T network before moving. Compare plans from different prepaid providers.

Because the provider uses AT&T towers, consumers have access to the superfast LTE network, covering nearly 99 percent of the US landmass. You'll be able to use the mobile hotspot that comes standard with most of the company's plans. This feature allows you to use a single plan to connect several digital devices to the same network.

Families can save up to 20% on their monthly payments by using Pure Talk's family pricing. New users can get a 50% discount on their first month. Each person you suggest to the Pure Talk referral program earns you \$20 in bill credits, which you will get after your friend has completed their second month of service.

The Best Pure Talk Senior Cell Phone Plans

Pure Talk does not offer a specific mobile phone plan for seniors; however, they offer some of the most trustworthy plans for the elderly. With the Unlimited Pure Talk package, seniors can acquire no-contract, low-cost Unlimited Talk and Text cell phone services.

Additionally, you can add more lines to that plan to save up to 20% on your total monthly wireless price. The company offers a total of seven low-cost prepaid cell phone plans. These plans range in price from \$20 for 2GB to \$65 for 60GB of data and 25GB of hotspot data per month.

However, the \$20 2GB plan is only available with two or more lines. Each plan includes a monthly allotment of high-speed data. After you've used up your high-speed data, you'll get unlimited 256Kbps data.

That isn't particularly quick, but it's fast enough to listen to music and load some online pages if you're patient. These special offers include:

- **You will receive 2GB of mobile data at only \$20.**
- **For \$25, the company provides 4GB of cellular data.**
- **Pure Talk 6GB plan provides 6GB data at \$30.**
- **Pure Talk 10GB package offers \$35 for 10GB of mobile data.**
- **At only \$45, you will subscribe to the Pure Talk 20GB, which provides 20GB of data.**

- **Pure Talk 60GB and 15GB Hotspot plan is offered at \$55.**
- **Pure Talk 60GB plus 25GB Hotspot package is provided at \$65.**

It's also worth noting that Pure Talk has an international calling add-on that allows you to call from within the United States. You buy a \$10 international calling card, and then your overseas calls are deducted from that \$10 balance at a pay-per-minute rate determined by the country you're calling. Call Pure Talk's customer care line at **(877) 820-7873** and purchase a \$10 international calling card to make overseas calls.

How Can You Switch to Pure Talk?

Pure Talk has countrywide service with no commitments or hidden costs, making it an excellent choice for those searching for a new provider. The company makes the changeover process as simple as possible.

You don't have to buy a new phone or a new phone number; Pure Talk allows you to keep both. Their customer service team is based in the United States and is available to assist you.

Because of its low data allowance and low prices, the company is ideal for seniors. It also offers a risk-free first-month guarantee, allowing you to try it out and obtain a refund if you're not satisfied.

You can get in touch with the staff to learn more about the different plans and how to switch and start saving. Switching to PureTalk, on the other hand, is a breeze. It's as simple as three steps.

- **Choose a plan. It's important to note that the more lines you add, the more money you save.**
- **Get ready to make the change. Check whether your old bills have been paid and if your GSM handset has been unlocked.**
- **Create your new strategy. Maintain your current carrier account until your phone number has been moved over. Cancel your old plan after you're sure your new one is up and functioning. If you bought a new device, it should be ready to use. If you're bringing your own phone, you'll need to acquire a PureTalk SIM card, which costs \$3 online. Then, to acquire the plan, follow the instructions.**

Final Words

Pure Talk is a well-known MVNO under AT&T offering low-cost prepaid services. Customers appreciate their low-cost services and their hotspot plans, unlimited plans, multi-line discounts, and international plans. This is a firm worth joining because of all of the benefits.

It is also appropriate for seniors due to its reasonable plans, limited data allowance, and the absence of long-distance costs, roaming fees, additional handset fees, and prepaid cards.
